

Sumfoam
OIL BINDING AGENT
Powerful. Robust.

Sumfoam

Absorption characteristics

Sumfoam is an extremely robust oil binding agent. As filling for common oil barriers it can be used as absorbents in oil catastrophes, as bilge water oil remover or in case of hazard zones around machines.

- 🌿 Extraordinary loading capacity based on its porosity of 90 %
- 🌿 Pore size in nano range results in a high absorption strength
- 🌿 Outstanding binding performance by strong capillary force
- 🌿 No desorption due to its enormous pressure resistance
- 🌿 Usable for all common oil barriers and absorbent cushions
